Scope of Work for Primary system Proposal

Unless otherwise specified each install will include the following: (Services may vary based on equipment selection)

Unless otherwise specified each install will include the following:

:When replacing or installing roof top equipment

New equipment to connect to existing ductwork electric and fuel runs. Repairs or upgrades to the circuits will be additional cost to customer if required

Crane fee for new RTU installation and removal of existing will be billed out to purchaser at direct cost,.

Current roof as far as leaks, is unknown at this point, may require roofer to seal curb area after installation if leaks occur

Access for crane parking to be made available day of install by customer

Smoke detectors are optional and depends on local state or municipality codes

Adapt a curbs if required may require a roofer to provide sealing

Mutli - stage thermostat may be required based on equipment selection

Unless otherwise specified each install will include the following: (Services may vary based on equipment selection)

Smoke alarm if needed installed by HVAC contractor, if it is to be tied into an alarm system that is to be done by others

With any equipment installation:

- We are going to make sure your new equipment is installed best possible way considering all installation circumstances or limitations, and it meets or exceeds all local code requirements
- We will remove and dispose any old equipment (Unless otherwise specified in this contract)
- After installation is completed, installers will check equipment, run it for couple cycles make sure it operates properly, before they leave.
- After installation is completed, our installers will clean up all work areas and show you how to use and thermostat control new equipment
- If thermostat is being installed, we will connect it to present thermostat wire
- If present wire is not compatible with the new thermostat, we will run new wire when easily accessible and possible, up to ½ hour of labor and up to 25' of wire at no extra charge. (Otherwise we will provide you with alternative solution, which may cost extra over and above this contract).
- If any high voltage circuit/panel upgrade is required for the new equipment to properly and safely operate, purchaser is responsible for extra cost beyond this installation order.
- **Everything we install comes with at least one-year installation and equipment labor warranty by installer, plus all manufacturer's parts warranties**
