

**McKnight Crossings Church of Christ  
Safety and Security Team**

**Proposal for Sunday morning security  
February 2022**

This memo outlines a proposal to reduce the individuals needed on a Sunday morning while still providing adequate security for the Sunday morning assembly.

I have developed a website showing a live feed of several of our security cameras (see **Attachment A**). My thought is to have this website up on a monitor at the kid's check-in desk in the foyer. This is a central spot that would allow a single Security Team member to watch the main entrance to the building, the main entrance to the worship area, the kid's classrooms, AND the security cameras.

With this setup I think appropriate security would be maintained with 1.5 individuals. My thought is one person would be on main security duty and work the foyer area and use the website view of the security cameras to monitor activity full-time while church is in session on Sunday (worship and class time). The second individual (the .5 individual) would assist and walk the building before and after worship but could sit-in on worship once the service got started. This individual would still be mic'd up and would need to be alert of anything curious or alarming in the worship area.

Give this some thought and I'll try and schedule a time for the Safety Team to discuss, possibly after worship some Sunday or on a video conference call. Also, always feel free to email with any questions or suggestions: [bret\\_blackford@yahoo.com](mailto:bret_blackford@yahoo.com).

Appreciate all your service!!

## Attachment A

Below is a screen-shot from the MX security camera website that was developed to be used by the MX Security Team. Intent is that this access to live video will allow better security monitoring on a Sunday morning.
